STORIBOARD
paintings and drawings

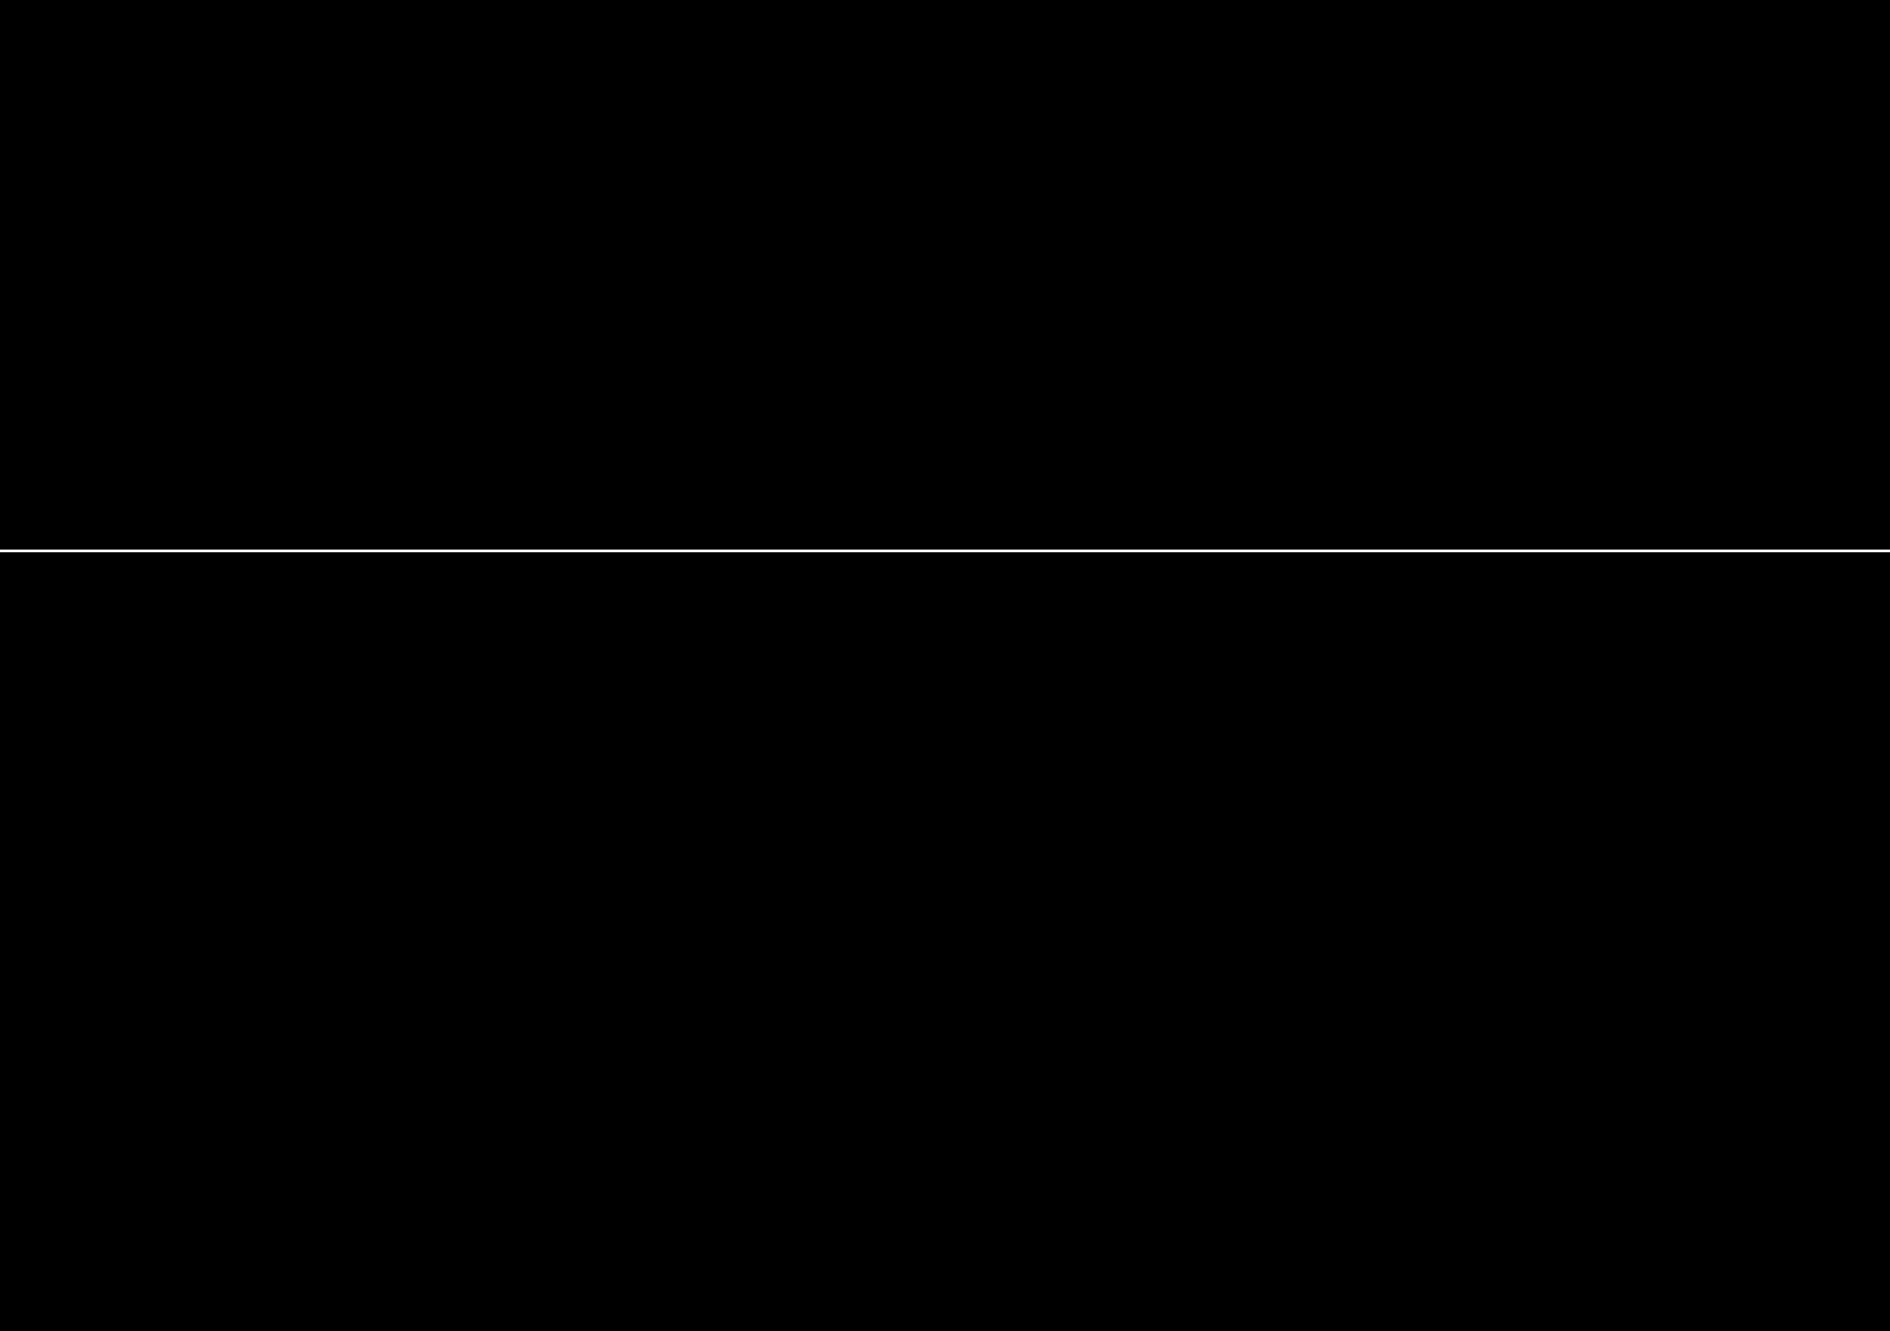

STORYBOARD

Storyboards are graphic organizers such as a series of illustrations or images displayed in sequence for the purpose of pre-visualizing a motion picture, animation or motion graphic.

Our works represent the way that we imagine movie, which is in relation with our (already done or future) short films. Paintings and drawings are not a part of “shooting process” like in classic storyboard. They are more likely an illustration of atmosphere, which can be described as “movie-like”.
